EXPERIENCE

- Opinion Mining: We have done project on opinion mining .It was simple data representation using python to visualize data. I got to know how to analyze the data and work set it for use.
 - Online lab reporting system was small case study project in software development in UML where I came to know about connectivity and specifically focus on backend.
 - I've worked on front end web developing and created a small resume site to give the basic idea about my interest.
 - Also I've been participating in activities in our institute
-
